

Christine Morrison

Music to Soothe the Soul

Christine Morrison is a unique Musician, Composer & Teacher. Her piano music and vocal sounds have been said to "Soothe the Soul". Whatever your soul requires, her sounds & music reach it – in a gentle and compassionate way, allowing you to discover your inner talents and knowledge.

Christine was guided to work with sound and music when she was recovering from an illness. It played a major part in her healing, taking her on a journey of self-discovery and an awakening of her soul, also guiding her to realise her soul's purpose.

Christine knows that her illness was meant to be. It guided her to remember how to use sound, colour and music in her life, and how to use it to connect with other realms and dimensions.

Christine believes that it is time for many of us to return to working with sound. Time for us to reconnect with our soul, to unlock our talents and gifts and gain insights at deep levels.

Throughout her journey, Christine has had experiences with Aboriginal culture and Spirituality. She has worked with Bob Randall from Uluru for many years and has a special bond with the land which is shared through her music and workshops. Her sounds and music connect the land and ancient ones deep within your Soul.

Today Christine travels across Australia and Japan, conducting workshops, retreats, individual sessions and concerts. Through the universal languages of sound, music and colour, she helps people know and befriend their own hearts, always with great gentleness and compassion.

Her guiding passion is the joy of supporting other people to make the changes they need and to connect deeply with the wisdom of their souls and hearts.

"She has brought to Earth the sacred sounds from the Angelic realms of light. Every note feels as if it has been touched by the wings and the breath of Angels"

Lorna May Todd, Author of "Working with Angels and Nature Spirits"

Christine provided a deeply nurturing and safe healing space that allowed me to gently unfold like a lily opening up to the sunlight. Her music touched places I didn't even know exist."
